Waseca County has been making efforts to research and potentially expand our broadband services within the County. It is one of the goals of our Economic Development Authority to do so, and that goal is closely related to parts of the City of Waseca's Vision 2030 project. Making sure that our community members have access to necessary tools like broadband, and that we attract and maintain high-quality businesses to our area, are major keys to the success of our County.
